

For those of us who spend longer and longer periods of time in our cars commuting, travelling, and spending valuable time with family we ask that you please oppose any further regulation of the satellite radio medium. We use many of the channels for informative updates that help us plan our day and need the updates to be accurate and concise. We pay for this service, and do not feel it should be regulated. Please oppose any changes and/or additional regulations regarding satellite radio. Thank you. A nurse, a CPA, and 2 kids who pay taxes and love our satellite radio
